

Stefano Gotti - Curriculum Vitae

Associate Professor (BIO/16, Human Anatomy), Department of Neuroscience,
University of Torino

Education:

1997. Master Degree in Biological Science, University of Torino.

2004. PhD in Neurological Science, University of Torino

Guest referee for international scientific journals:

Brain Research, Journal of, Chemical Neuroanatomy, Cell and Tissue Research,
Physiology and Behavior, Neurological Science, Histology and Histopathology,
Neurobiology of Disease

Research Interests:

The central focus of P.I. researches is the study of the interactions among steroids and nervous circuits. Previous studies of my laboratory have investigated the role of early exposure to gonadal hormones in the differentiation of sexually dimorphic circuits and behaviors in mammals. The discovery of the involvement of neuroactive steroids (steroids produced within the brain) in several physiological activities implies that minimal alterations of steroid levels, or exposure to exogenous chemicals that can bind to steroids' receptors can have long term effects on animal and human health. The study of the effects of steroids on the nervous system has therefore high potential therapeutic perspectives. Recently we began to investigate the role of steroids in modulating postnatal and adult neurogenesis. Field of expertise: morphology, immunohistochemistry, behavior, surgical manipulation, use of transgenic models.

Scientific Societies:

Society of Behavioral Neuroendocrinology (SBN); Federation of European Neuroscience Societies (FENS); Società Italiana di Neuroscienze (SINS); Gruppo Italiano per lo studio della Neuromorfologia (GISN); Gruppo Italiano di Scienze Neuroendocrine (GISNe); Società Italiana Anatomia e Istologia (SIAI)

Membership in research centers:

Neuroscience Institute Cavalieri Ottolenghi (NICO, Orbassano, Turin);

PhD program

Member of the teaching staff of the PhD course in Neuroscience

Organizing Activity:

Member of the Local organizing committee of the International Meetings Steroids and Nervous System (Torino 2001, 2003, 2005, 2007, 2009, 2011, 2013, 2015, 2017, 2019) and co-editors in the realization of the scientific contributions proceedings.

Courses Taught at the University of Torino:

Human Anatomy and Neuroanatomy (Master in Cellular and Molecular Biology)

Human Anatomy (Bachelor degree in Natural Sciences)

Human Anatomy and Eye Anatomy (Bachelor degree in Optic and Optometry)

Articles on peer reviewed journals (last 5 years)
